

RR600 ATV/UTV Logging/Dump Trailer

2 Trailers in 1

The Range Road RR600 trailer easily converts from a dump box style trailer to a logging trailer. Simply remove the two hinge pins and slide the box off. Four extension arms can be installed to increase the carrying capacity of logs. The length of the trailer is also adjustable making it possible to safely haul lumber or logs up to 3.65M (12') long!

- The RR600 was designed as a heavy duty and highly versatile trailer for acreage owners to aid in maintaining their properties and woodlots, intended to be towed behind your ATV, UTV or tractor, it will haul dirt, rocks, firewood, logs and more. This makes the perfect addition for property owners, sawyers and hunters.
- The RR600 dump box is made from stamped galvanized steel and can easily be tilted to a 65° angle using the mechanical winch to lift it.
- **Heavy Duty Frame Construction** - The RR600 frame and chassis is made of heavy duty 4mm thick square tube and seam welded. The entire chassis is then galvanized to protect from corrosion.
- The trailer tongue is designed with a pivoting ball hitch ensuring that the trailer and your machine function and ride independently of one another. It also features a greasable fitting.
- The dump box is also galvanized and is mounted to it's own powder coated reinforcement structure for added rigidity.
- The complete chassis system connects to a heavy duty tandem walking beam axle system featuring 4-bolt hub bearings where the four 22x12-8 offroad ATV tires are mounted. The walking beam suspension utilizes one pivoting pin that comes standard with a greasable fitting.

Hauling Capacity:	910 Kg (2000 lb)
Dumping Capacity:	295 Kg (650 lb)
Crane Lifting Capacity:	250 Kg (440 lb)
Tongue Weight:	54 Kg (120 lb)
RR600 Weight:	308 Kg (680 lb)
Overall Dimensions	- Short: LxWxH 295cm x 116cm x 188cm (116" x 45 1/2" x 74") - Long: LxWxH 376cm x 116cm x 188cm (148" x 45 1/2" x 74")
Tow Ball Size:	2" ball hitch
Ground Clearance:	33cm (13") at the center of frame, 23cm (9") under axles
Bed Volume:	1.1 yard
Bed Weight:	73Kg (160 lb) (including removable tailgates)
Bed Dimensions:	LxWxH 196cm x 100cm x 49.5cm (77" x 39 1/2" x 19 1/2")
Cable Size:	5.6mm x 10m (7/32" x 30') length
Boom Angle Positions:	45° left and right, 90° total sweep
Number of Tires:	4 Tire Size 22x12 - 8
